Tiger Lily

LILIES

To grow lilies successfully they should have a well drained soil, be planted six to eight inches deep, with a little sand around each bulb to keep from rotting. They should be grown three or four years and then transplanted, preferably in September, and set at once to prevent drying out. It is well to plant them among evergreens or plants with heavy foliage, and cover the beds with leaves or like protection during the winter.

Our bulbs can be supplied in September or October, or early spring.

	Each
L. CANDIDUM—Madonna Lily—Large fragrant, pure white flowers—early July	\$.25
L. HANSONI—Reddish orange, three feet high. Flowers six to ten in cluster—June-July50
L. HENRYI—Orange yellow, four to five feet high. Flowers August, September60
L. SARGENTIAE—Milk white, yellow throat. Flowers July.....	1.00
L. SPECIOSUM RUBRUM—White, shaded with rose, medium height. Flowers August and September.....	.60
L. TENUIFOLIUM—Scarlet, small slender growing. Height eighteen inches. Flowers August and September.....	.25
L. TEN. GOLDEN GLEAM—Apricot shade, vigorous grower.....	.50
L. TIGRINUM—Tiger Lily—Blossoms July, August.....	.15
L. UMBRELLATUM—Red orange, tall, good grower. June, July....	.20

Plant Trees
They Will Add Beauty and Value to Your Home

Beautify With Shrubs

A Word About Tree Acres

THIS Nursery is located one mile east of Shelburne Falls, or about eight miles west of Greenfield, on the Mohawk Trail in sight of the Sweetheart Tea House. Stock will be dug fresh and may be taken with you, or we will ship by express, freight or truck, as preferred.

The roots of evergreens will be balled and burlapped, if of sufficient size, while small transplants will be packed in damp moss. In either case they will stand shipment to any part of the country.

Stock not listed herein we will gladly procure on short notice, and shall be pleased to advise and quote prices on large or small orders.

Many shrubs and plants can be safely moved during the summer, but April, May and first of June for spring planting, and last of August, September and October for fall planting, are the best months for this work.

Nearby planting we can often do at a reasonable charge, but anyone can easily set stock out by following a few planting instructions, as printed on this page.

Conditions
Prices are net, F. O. B. cars, except as noted, packing added at cost.
There will be no charge for packing when cash in full accompanies order.
Twenty-five at the hundred rate; 250 at the 1,000 rate, unless noted.
Lower prices on lots from 10,000 to 100,000 and up.
All stock is listed subject to prior sale.
We have larger sizes and various species other than those listed which we will gladly quote on application.
In the case of all sizes, we reserve the right to decline any order for a quantity too small to make shipment profitable.
The two white pines (strobis and flexilis) can be shipped anywhere in the New England states and New York.

Planting Instructions
On arrival the trees should be "heeled in" at once in a moist, shady place by digging a trench, putting the bunches of trees in it in a vertical position, then throwing dirt over the roots and firmly tamping down with the feet.
If dry, the roots should be dipped in a puddle of mud and water before being heeled in. After heeling in, water occasionally.
The planter must set the trees slightly deeper than they originally grew, and set them straight, plenty of fine dirt being placed about the roots and very firmly tamped down with the feet. The roots must not be allowed to become dry, even for a few minutes. In planting sod ground the sod should be taken off for about a foot square around the hole and not used again.

Ornamental Stock with Ball of Earth
Evergreens. The trees should be set a trifle lower than they stood in the nursery. Dig the hole a foot larger than the diameter of the ball. Place good loamy soil in the bottom, set tree at proper height, and fill in with good soil, packing firmly by tramping, or setting by filling hole with water.
Burlap may be loosened at the top of ball and rolled back or cut off, but need not be entirely removed.
Perennials are best planted with trowel or hand spade. Remove badly injured or dried leaves. Trim long straggling roots, or bruised or damaged part. Plant so that roots spread out naturally. Plants with crowns should be set just below the surface of the ground.

Display House
Our screened display-house is conveniently located at the roadside so that customers may examine stock either by day, or in the evening if more convenient, without walking over the grounds unless they wish.
Ample parking space is provided, and balled and burlapped samples of the most popular varieties are always on display.
Landscape Service. Provided your place is within a reasonable distance, we will gladly examine, advise, and make plans for beautifying your home, making no charge for this service if we carry out the work. Otherwise traveling expenses will be charged.

Supplies
PEAT MOSS per bale \$3.00
BIRD BATHS \$5.50 to 17.00 each
Sun Dials, Gazing Globes, Lawn Ornaments, Garden Furniture and Pottery—prices on request.

Lawn Specials
Bleeding Heart, large clumps, \$.50
Mayflowering Viburnum, 18 to 24 in., 1.25

RHODODENDRON—Maximum	18 to 24 in. 3.00

Collected Evergreens
MT. LAUREL (Kalmia latifolia)
Prices on request.

Single Peony

Clematis

Peonies
Peonies may be planted almost any time of the year, but are usually planted in the fall, from September to November, and early in the spring before the new growth starts too much.
The roots should be planted so that the buds are about two inches below the surface when the ground has settled around them. Too deep planting will result in good foliage but no blooms.

Adolph Rousseau—deep garnet	Each \$1.50
Albert Crousseau—shell pink	1.50
Alsace Lorraine—white	1.50
Baroness Schroeder—white	1.50
Cherry Hill—deep garnet	2.50
Edulis Superba—deep rose pink	.50
Festiva maxima—ivory white	.75
Jules Calot—rose pink	1.00
Karl Rosenfield—dark crimson	1.50
Reine Hortense—flesh	1.50
Whitley Major (Single)—blush white	1.50

Climbing Vines

ENGLEMANN IVY (Ampelopsis quinquefolia englemanni)	2-yr. \$.40
CLEMATIS (Clematis paniculata)	2-yr. .50
